

BRAIN INJURY FACT SHEET

Between 2010 and 2014, there were **7,481 TBI deaths** and **25,224 TBI hospitalizations in Virginia**, with numbers trending upwards; it is the **number one reported cause of injury death** in Virginia¹. Based on US Census numbers, CDC estimates of prevalence², and the 2015 Virginia Department of Health Behavioral Risk Factor Surveillance Survey³, **nearly 400,000 Virginians live with a disability as a result of a TBI or stroke.**

ACQUIRED BRAIN INJURY IS...	BRAIN INJURY CAN CREATE DIFFICULTIES WITH...	
<p>An injury to the brain that is not hereditary, congenital, degenerative, or induced by birth trauma. It occurs after birth, and results in changes in the activity, integrity, and functional ability of the brain. It includes traumatic injuries caused by external physical forces (e.g. the head is struck by an object or an object strikes the head) as well as internal insults to the brain that causes brain cells to die (e.g. stroke or lack of oxygen).</p> <p style="text-align: right;">§ 37.2 403</p>	<p>Attention Concentration Judgment Reasoning Abstract Thinking Problem Solving Impulse Control Anxiety Balance</p>	<p>Coordination Mobility Information Processing Sequencing Planning and Organizing Communication Depression</p>

STATE FUNDED BRAIN INJURY PROGRAMS IN VIRGINIA

RESOURCE COORDINATION - STATE WIDE:

Provides outreach to people recently hospitalized in Virginia for brain injury; information and referral, consultation and technical assistance services to persons with brain injury, family caregivers and professionals. Includes education on brain injury, public awareness activities and advocacy to enhance services for Virginians with brain injury. The Brain Injury Association of Virginia is the sole provider, and covers the entire state.

CASE MANAGEMENT:

Serves adults, children, and families affected by brain injury; identifies needs, supports, and resources; works with client to develop an individualized, goal driven service plan. Activities may involve in-home consultation, intervention, participation in special education school planning, life skills training, and oversight of contracted support services.

Providers include:

- | | |
|--|--|
| Egleston Services | Brain Injury Services of SWVA (adult, pediatric) |
| Brain Injury Connections of the Shenandoah Valley (adult, pediatric) | No Limits Eastern Shore (adult) |
| Brain Injury Services (adult, pediatric) | The Bridge Line (adult) |
| Community Brain Injury Services (adult) | Virginia Supportive Housing (adult residential) |

COMMUNITY BASED CLUBHOUSE AND DAY PROGRAMS:

“Stand alone” programs offering work-related and social activities in a supportive environment. Provide limited case management services that include the development of individualized plans of services with personal goals; provides educational, vocational, and therapeutic social environments for survivors of acquired brain injury.
