# 5 Dimensions of TBI-Related Irritability

## AFFECTIVE

Moods and feelings

**What it looks like:**

Moodiness, snapping, anger, agitation.

**Common triggers:**

Feeling overwhelmed, pressured, frustrated, challenged, afraid, or out of control.

*"It's kind of like living on the edge of disaster all the time."*

## BEHAVIORAL

Self-control and time management

**What it looks like:**

Loss-of-control behaviors including throwing things, slamming doors, yelling.

**Common triggers:**

Procrastination, attempting too many things at once.

*"When I get grumpy, I'm less inhibited, I get angry, and then at times I've been known to go ballistic."*

## COGNITIVE/ PERCEPTUAL

Negative thoughts about self and others

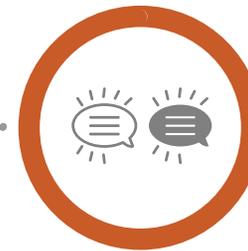

**What it looks like:**

Brooding about past events or abilities.

**Common triggers:**

Negative social comparisons, perceived injustices, dissatisfaction with self.

*"I get so irritable with myself because of not doing what I know I should be able to do."*

## RELATIONAL

Interpersonal communication

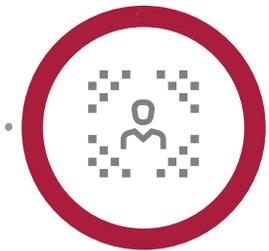

**What it looks like:**

Difficulty with small talk and nonverbal communication.

**Common triggers:**

Family member not accepting injury or its implications, role reversals.

*"We react the way we've always reacted but the person with brain injury cannot interpret what we're doing in the same way."*

## ENVIRONMENTAL

Sensory overload and changes in routines

**What it looks like:**

Agitation, anger, snapping.

**Common triggers:**

Diminished daylight, high levels of noise, crowds, unexpected changes to routine or schedule.

*"A lot of it is you're overloaded because there is input coming from everywhere and you can't screen it all out."*
