Strengthening Virginia's Safety Net for Residents Living With Brain Injury

Virginians living with brain injury deserve consistent, accessible, and high-quality services no matter where they live. This **\$1.3 million** funding request would strengthen and expand the existing state-contracted safety net for brain injury services, increasing statewide coverage and

thousand square miles.

Urban regions remain underserved as well. In Hampton Roads—Virginia's second most populated region—**only two full-time case managers** currently serve the entire area.

Newly expanded regions need outreach.

Communities that only recently gained access to services need increased marketing and engagement so residents know support is available.

More professional staff are needed statewide. Case managers, Clubhouse/day program staff, licensed counselors, rehabilitation therapists, life-skills specialists, and employment staff are all critical to providing the same level of support commonly available in other disability service systems.

Recent funding was vetoed. In FY26, the General Assembly appropriated **\$750,000** to strengthen

[Insert your comments here: Tell why it's important. Include some of your story or the story of your loved one.]

Virginians living with brain injury deserve consistent, accessible, and high-quality services no matter where they live. HB#/SB# would strengthen and expand the existing state-contracted safety net for brain injury services, increasing statewide coverage and enhancing programs that many residents rely on.

This new funding would support additional case managers, clinical professionals, housing options, and program capacity to meet the growing demand for specialized brain injury services across Virginia. Many programs currently maintain waiting lists and struggle to meet the needs of residents who require intensive, long-term, and highly specialized supports.

Subject

Please Strengthen the Brain Injury Care System

Message Body

It is important to me that the brain injury care network is strengthened because after surviving a stroke, I needed cognitive therapy and case management, but staff shortages and long waiting lists made access difficult. Delayed services slowed my recovery and limited my ability to regain independence. Strengthening the network and workforce would help survivors like me get the timely support we need.

Virginians living with brain injury deserve consistent, accessible, and high-quality services no matter where they live. wrestling with outdated technology instead of serving Virginians directly.

What This \$420,000 Investment Would Do for Virginians Living With Brain Injury

FY27 — \$120,000 (One-Time Funding)

- Conduct a comprehensive statewide assessment of:
 - Current and future provider needs
 - Requirements for a modern, VITA-approved Client Relationship Management (CRM) or Electronic Health Record (EHR) system
 - System features needed to improve communication, record sharing, and outcome tracking for clients and caregivers

FY28 — \$300,000 (One-Time Funding)

- Develop a detailed implementation plan highlighting:
 - New business processes and technology needs
 - Standardized data and outcome measures
